# L

## Lambda Sensor

Oxygen sensor that's placed inside the exhaust system to measure exhaust gas oxygen content

## Lapping (Valves)

Process of de-carbonizing/ cleaning the valve faces and valve seats

## Late Model

The MoCo decided what and when to call early and late models based on many factors. One of which is the date that a change was made. For instance, if in mid July (early season) Sportster models had a part or manufacturing change, late July or early August becomes "Late" for the model(s) affected. Same as with any other month of the season.

## LCD

Abbreviation for Liquid Crystal Display

## Lean Angle

## LED

Abbreviation for Light Emitting Diode

## Lining (cylinders)

Process of inserting a steel cylinder insert into an aluminum alloy cylinder block <sup>1)</sup>

## LT

Low Tension. Describes the electrical circuit from the power supply to the primary side of the ignition coil.  
<sup>2)</sup>

## Lubrication

The reduction of friction and wear using a friction-reducing layer. This layer can be liquid, solid or plastic.  
<sup>3)</sup>
