# **NEW 60 WEIGHT OIL**

## **PREMIUM II EXTRA HEAVY GRADE 60 MOTORCYCLE OIL**

### **NOW AVAILABLE FROM ALL OF OUR SHIPPING POINTS**

We have had numerous inquiries from dealers and riders requesting that we offer a heavier oil for hot weather riding.

As a result, we are introducing a new formula 60 weight oil that has been designed to provide outstanding hot weather protection, (80° F and above), in both old and new motorcycles alike.

As with all of Harley-Davidson's motorcycle oils, Premium II Extra Heavy Grade 60 meets the newest and toughest oil requirements for gasoline engines determined by the American Petroleum Institute - API Service SF. However, additional features were added that are not found in other SF quality oils of popular brands for automotive use. Harley-Davidson's oils contain a special detergent additive based on magnesium chemistry which not only provides excellent protection against the formation of high temperature varnish deposits, but also protects against forming the type of deposits that cause pre-ignition in high temperature air-cooled motorcycle engines.

H-D oils also contain an inhibitor that provides greater oxidation protection at high temperatures than automotive SF oils to provide the needed protection under the more severe high temperature operation of an air-cooled motorcycle engine. They also contain a high concentration of an extreme pressure anti-wear

agent that helps to ensure long engine life by protecting in the broader temperature ranges to which the motorcycle engine parts are subjected.

Now you and your customers can choose the oil best suited to the climate and your individual riding needs.

POWER BLEND OIL

A super premium 20W-50 multi-grade oil that provides easier starts and more efficient lubrication under varying conditions and operating temperatures from 10° to 100° plus.

PREMIUM II OIL

There is a choice of four different viscosity grades depending on the ambient air temperature in which the motorcycle is driven:

- \* Extra Heavy Grade 60 - Temperature above 80° F
- \* Regular Heavy - Temperature above 60° F
- \* Medium Heavy - Temperature above 40° F
- \* Special Light - Temperature -20° to 40° F

**PRICING**

Orders for all grades of Premium II and Power Blend can be combined to qualify for quantity discounts.

PREMIUM II EXTRA HEAVY GRADE 60

Part No.

**99815X**

**CASE OF 24 QUARTS**

Suggested List: \$43.20 (\$1.80 per quart)

Net - Qty.: ( 1 - 24) \$28.08  
(25 - 49) 26.68  
(50 - 99) 25.27  
(100- Up) 24.57
