Tufoil LUBIT-8 CHAIN & CABLE LUBE

Attached is a color brochure and technical information sheet on Lubit-8 chain and cable lube recently introduced by Eagle Iron.

This product is a terrific impulse item, and Eagle Iron is the exclusive distributor for it in the motorcycle parts and accessories aftermarket.

Lubit-8 is offered in 2 attractive counter displays or blister carded as follows:

<u>PART NUMBER</u>	<u>DESCRIPTION</u>	<u>DEALER NET</u>
94968-85TV	Blister Carded (case of 24)	\$32.40
94969-85TV	Loose (36 piece counter display)	46.80
94970-85TV	Loose (72 piece counter display)	93.60

All of the above have a suggested retail price of \$1.98 each.

The Patented Super Oil with Teflon® A little goes a **LONG** way!

36 piece counter display

72 piece counter display

blister carded.
(24 per case)

LUBIT-8: A terrific impulse item!

- Lubit-8, the result of more than 10 years of research and development.
- Special patented* process permanently disperses micro-miniature particles of Teflon® and Fluon® in LUBIT-8.
- Needle tip applicator permits use in hard to reach places. Can be carried in pocket or purse!
- Super-slippery Lubit-8 surface resists dust, does not coagulate, has no oily residue and lasts almost indefinitely!
- Unaffected by temperature extremes (-60°F to +500°F). Lubit-8 actually prevents locks from freezing!
- Penetrating action frees "frozen" nuts, bolts, locks, and bearings.

Use it anywhere!

- Bicycles
- Fishing Tackle
- Appliances
- Electric Motors
- Hinges/Latches/Locks
- Garden Equipment
- Sewing Machines
- Ski Bindings
- Power & Hand Tools
- Bolts/Screws/Nuts
- Sliding Tracks
- Firearms
- Lawn Furniture
- Toys
- Carriages
- And much more!

LUBIT-8: Another great lubricant from the makers of Tufoil.

lubit-8[®]

The Patented Super Oil with Teflon[®]

**A breakthrough super-lubricant
that lubricates, cleans and
preserves.**

Lubit-8[®] is the product of over 10 years of research and development by Fluoramics, Inc. A special, patented process is utilized to permanently disperse micro-miniature particles of super-slippery Teflon[®] and Fluon[®] (polytetrafluoroethylene) in Lubit-8. When Lubit is applied, a super-slippery, protective coating is produced that dramatically reduces friction and wear. This Lubit-surface does not coagulate, resists dust and has no oil residue. The super-slick Lubit coating virtually eliminates sticking. In addition, the Lubit penetrating action gets into rust and corrosion, freeing "frozen" nuts and bolts, locks, bearings, hinges, etc. Lubit can be used almost anywhere, since it's unaffected by temperature extremes (-60°F to +500°F).

**Lubit is easy to use—
a few drops go a long way.**

Squeeze lightly for droplet application, harder for spray application. Allow time to penetrate, especially if old oil and dirt has caked the surface. Wipe away any residue. Move or slide areas where applied to get Lubit into all remote crevices. The superior lubricity and protective qualities of Lubit will remain almost indefinitely. Lubit is compatible with all oils and grease, can be applied over old lubricant and is an excellent cleaning agent. Contains detergents, avoid contact with eyes. Shake occasionally.

lubit-8[®]

**Penetrates, lubricates and protects
moving parts and metal surfaces.**

- Adjustable furniture
- Appliances
- Bicycles
- Bolts/screws/nuts
- Carriages
- Castors
- Electric motors
- Fishing tackle
- Golf clubs
- Hinges/latches/locks
- Lawn mowers
- Power and hand tools
- Roller skates
- Scissors
- Sewing machines
- Ski bindings
- Sliding tracks
- Swings
- Toys
- Wagons

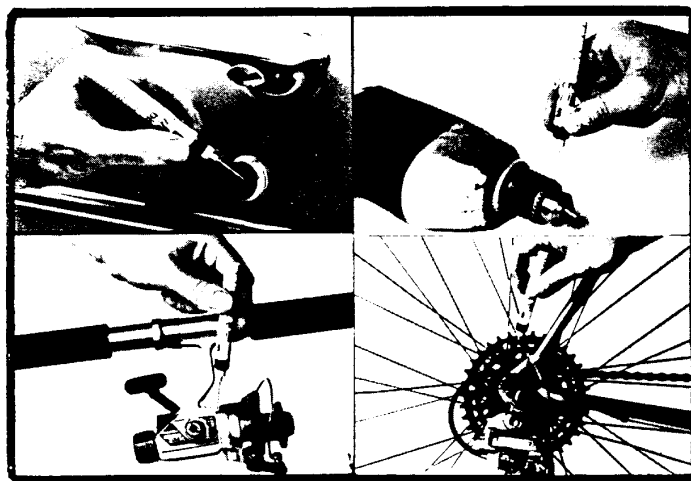

And hundreds of other items...

If it moves...lubit!

Proven, Patented & Guaranteed

**lubit-8[®] IS TO OIL
WHAT
"SUPER AND CRAZY"
IS TO GLUE!**

A little goes a LONG way

The Precision Oiler

- Penetrates
- Lubricates
- Cleans
- Effective from -60° to +500°
- Polishes and Preserves

Use it anywhere!

Works better...

...lasts longer.

If it moves...lubit!

Four-Ball Friction Test of Lubricants

BY
FRANKLIN G. REICK
MARCH 15, 1982

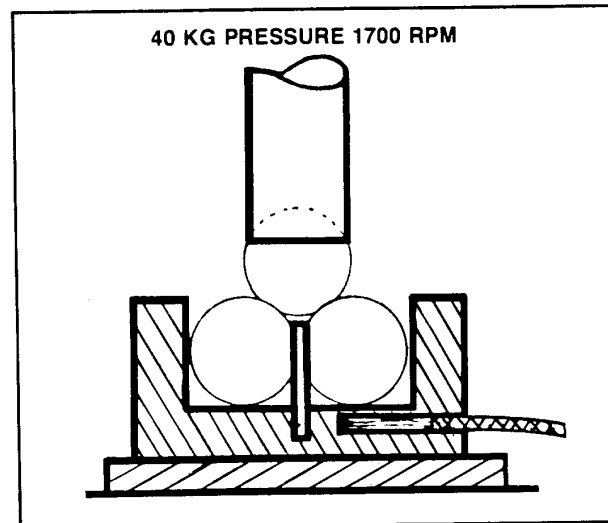

At the request of a number of our marketing people a survey was made of a cross section of lubricants currently available to the public.

All tests were run on our standard 4-ball tester. A strip chart recorded time versus temperature.

The curves presented here are in order of decreasing slope — the lowest friction (heat generation) is obtained with the Tufoil® products. These curves will be updated regularly. It should be obvious from the curves that the patented technology of Tufoil® is in a class by itself.

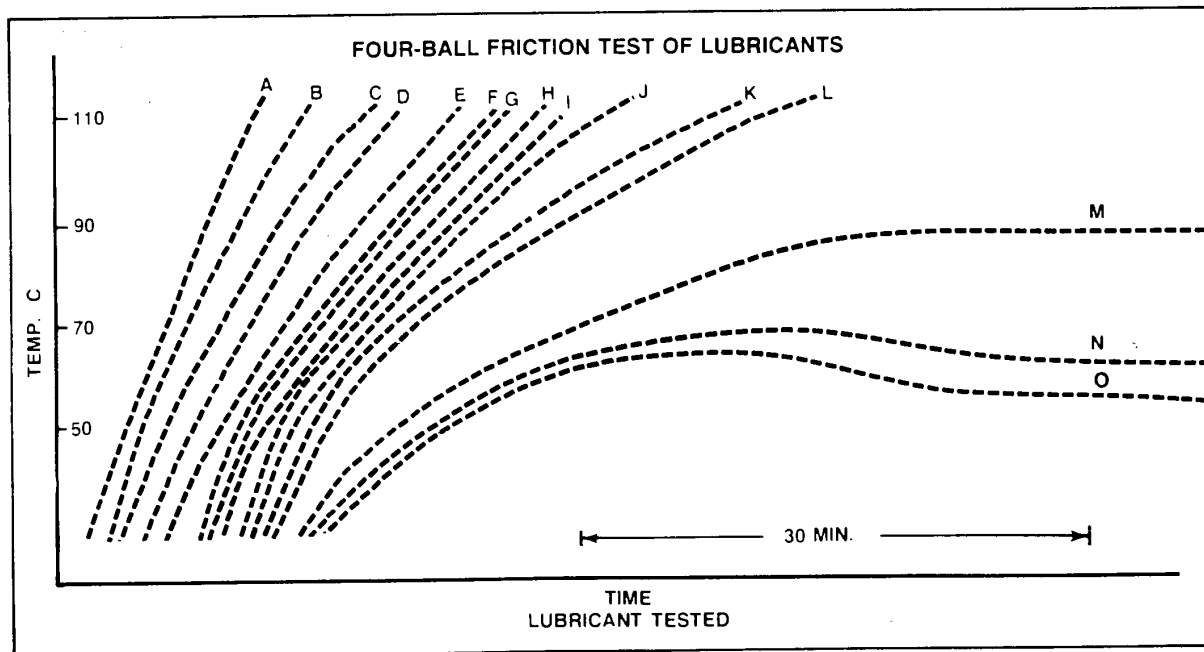

Scanning electron microscope photos will be taken soon of the balls from this test.

Tufoil® shows the lowest wear of the lot.
