QUART PAINT PRICE INCREASE

Due to VOC (Volatile Organic Compound) regulations in certain areas of the U.S. our supplier has found it necessary to change the formulation of our quart paints. The reformulation resulted in a raw material change with the formula, to increase the solids found in the paint.

Beginning 1/1/92 our paint supplier will begin labeling all quart containers with the VOC content as certification of what is inside. While we deplete our inventory at Transpak, you may receive mixed orders, some with VOC markings and some without. We will try to make this transition run as smooth as possible for you. As always, we at Harley-Davidson try to supply you with the highest quality product at the lowest reasonable price. Unfortunately, due to the reformulation we must pass along the following price increase to you:

ALL QUARTS, P/N's 98603:

New dealer net price: \$18.12

New sugg. retail price: \$27.87

For your convenience I have listed all the quart paint suffixes below:

A, AV, AZ, CJ, DA, DH, DY, DZ, EK, EW, EX, FF, FG, FK, FN, FP,
FY, GC, GD, GE, GH, GK, GN, GP, GR, GS, GV, GY, GZ, HA, HB, HC,
HE, HF, HG, HH, HI, HJ, HK, HL, HM, HN, HW, JA, JB, JE, JJ, JL,
JM, JN, JZ, KC, KE, KG, KH, VT.

Please update your Fall 1991 price books accordingly, and your new Spring 1992 books when you receive them. We apologize for any inconvenience this may have caused you.
