2021-01-05	Initial release

Purpose for Parts and Accessories Bulletin

To inform dealers that all Screamin' Eagle® Street Tuner calibrations will have a delayed availability due to the 2021 Electronic Control Module (ECM) change on Milwaukee-Eight® (MKE-8) models.

A new Screamin' Eagle Tuner Cable Kit (Part No. 41000979) will be required to tune 2021 MKE-8 models with the Screamin' Eagle Street Tuner. Model Year 2021 MKE-8 models have a new ECM, which requires the connectors to change on one side of the cable. This change provides Screamin' Eagle with another first to market advantage with our Street Tuner. For the DIY tuner, this cable is a must have for 2021 MKE-8 equipped vehicles. The kit provides all necessary connections between motorcycle, Vehicle Communication Interface (VCI), and computer, and permits downloading calibrations with the Street Tuner and Street Tuner software.

Update: Screamin' Eagle Street Tuner 49-State (only) calibrations for 2021 vehicles are now available. In addition, Street Tuner calibrations for 2018-2021 Softail® Stage III (119ci & 122ci) kits (49-State only) are also now available. Refer to PAB1111

Markets Affected

All markets are affected.

Key Messages

- All Screamin' Eagle Street Tuner calibrations will have a delayed availability due to the 2021 ECM change on MKE-8 models including Touring, CVO, Trike, Softail and XL models.
- Harley-Davidson is anticipating Street Tuner calibrations to be available in late February 2021.
- Harley-Davidson will communicate further updates through the Parts and Accessories (P&A) bulletin process.
- A new Screamin' Eagle Tuner Cable Kit (Part No. 41000979) will be required to tune 2021 MKE-8 models with the Screamin' Eagle Street Tuner.

- Screamin' Eagle Street Tuner 49-State (only) calibrations for 2021 vehicles are now available. In addition, Street Tuner calibrations for 2018-2021 Softail® Stage III (119ci & 122ci) kits (49-State only) are also now available.

Summary and Parts Affected

Stage I-IV Kits and Street Tuner

Calibrations will not be available for any Stage I, II, III, or IV product for all 2021 models until late February 2021.

Delayed Calibrations for Softail Kits

Table 2. Stage III Softail Kits

Stage III Size	Part No.	Finish
107 - 119 ci	92500083	Black Non-Highlighted
	92500096	Black Highlighted
114 - 122 ci	92500097	Black Highlighted
