

AIR FILTER COVER PLATE / SXT-125

A metal plate has been added between the air cleaner cover and the filter element gasket on all SXT-125 motorcycles, V.I.N. 3F 12110 H5, and above.

The plate provides a better gasket seat to prevent air leakage around the filter element. We recommend its use on early 1975 SXT motorcycles to improve filter operation.

Air Filter Cover Plate is available from the Parts Department under Part No. 29043-75P.
