M1510: MILWAUKEE-EIGHT ENGINE - NEW OIL FILTER

Purpose for Service Bulletin
To inform dealers of an improved oil filter for the MKE-8 (Milwaukee-Eight®) engine. The new oil filter uses the same synthetic 5-micron media as the current filter, however, the new oil filter effective media surface area was increased by 25%. The increased media supports the higher oil flow rate of MKE-8 engines.

See Figure 1. Fitment, clearance and performance testing has only been performed on MKE-8 vehicles. All Twin Cam vehicles continue to use the current oil filter.

NOTE
Changing to the new oil filter is not a warrantable event and can be performed at the customers next regular service interval.

Harley-Davidson recommends upgrading to the new oil filter at the customers next regular service interval.

NOTE
The continued use of the current oil filter, after initial 1,000 mi (1,600 km) service will not affect the warranty policy on the MKE-8 engine.

Change Dates
The new oil filter starts on the following dates:

- Running change at York facility: Approximately March 3, 2020
- P&A ordering availability: Approximately March 16, 2020

Motorcycles Affected
All vehicles equipped with the MKE-8

Markets Affected
All markets are affected.

Part Numbers
Refer to Table 1.

NOTE
In the interest of preserving customer safety and satisfaction, always check for outstanding recalls whenever any motorcycle is brought into your dealership for either maintenance or service.
