SPORTSTER SHOCK ABSORBERS

Rear shock absorber, part #54535-67, used on 1967 thru 1974 XLH and XLCH is no longer available.

In the future when replacing rear shocks on the above models, use the current model shock, part #54547-75 and the new shock mounting conversion kit, part #54529-76.

For proper vehicle handling always replace shock absorbers in pairs.

The shock mounting conversion kit consists of all mounting hardware with instructions for mounting one shock. The list price per kit is \$5.80 - net \$2.90.

We will soon be supplying the new shock and a mounting kit for all old style shocks that are presently on back order.
