## REF: Body Parts

### Document Tubes / Holders

This one is made from an old D cell Mag-light.

The cut end was sealed with a JB-Weld stick about 3/16" in from the edge (knurled end).

Then a layer of black silicone was applied on top of that finished flush to the edge.

The flashlight was a (3) - battery length light with plenty of tube length to cut off the switch and have enough left over.

Homemade Document Tube <sup>1)</sup>

You can put copies of your registration in a plastic bag inside this box that also holds the tag on.

The box will also hold small objects like a spark plug gapper or whatever you want to put in it.

It also has a keyed lock.
