## REF: Extra Models

This is an index page to collected information on HD models other than the Sportster, but not Big Twin models.

Here will be information about the mid-size-engined models such as the XR-750, XR-1000, Street 500, Street 750 or other similar models if there is collected information to share.

### XR-750

- [XR-750 General Information](#)
  - [Engine Mechanicals - Top & Bottom End](#)
  - [Oiling and Breathing Systems](#)
  - Carburetor, Intake Manifold & Exhaust
  - Electrical, Ignition, Charging
  - Transmission
  - Clutch, Drive Train
  - Suspension, Wheels, Brakes
  - [Frame, Body, Handlebars](#)
  - Miscellaneous

### XR-1000

Here is a paragraph of text that explains the make up of the XR-1000 model and the years of production. This paragraph will be a general overview that will be expanded in the xmodels20 subsection. Under this paragraph is the index to the various subsections related to the model, with the first subsection being 20, going up to 29 to cover all the aspects of the bike. If a particular model garners massive information that becomes unwieldy in this format, then a separate page configuration can be created that better deals with the mass of information. Putting the index here for the subsections on the model will keep the pages compact and allow returning to this overall page to pick another subsection for this model or pick another model to examine.

- [XR-1000 General Information](#)
  - [Engine Mechanical - Top & Bottom End](#)
  - [Carburetion](#)
  - [Electrical, Ignition, Charging](#)
  - [Transmission](#)
  - [Clutch, Drive Train](#)

- [Suspension, Wheels, Brakes](#)
- [Frame, Body, Handlebars](#)
- [Spare Unused](#)
- [Miscellaneous](#)
