

Parts & Accessories Bulletin

PAB # 547

September 18, 1995

The following Low Contact Ratio (LCR) Transmission gears have been discontinued or will be discontinued when stock is depleted. (See chart on reverse side)

As replacements we are offering High Contact Ratio (HCR) gears. This means whenever you need to replace a LCR gear you will replace it with a HCR gear and also replace its mating gear with a new HCR gear.

Note: LCR standard gears and HCR gears will not mate. (See Service Bulletin M-1037)

The benefits of replacing one LCR with two HCR gears are:

- 1) Whenever replacing a transmission gear H-D recommends replacing the mating gear to eliminate comebacks and ensure customer satisfaction.
- 2) The new list price for replacing a pair of HCR gears is now less than the list price for replacing a pair of LCR gears.
- 3) The replacement HCR gears service currently produced models, therefore you can service a greater number of vehicles with fewer gear part numbers in inventory.
- 4) HCR gears are quieter by design than LCR gears.

Please see reverse side for charts that outline the gear applications and new net/list prices.

New Net/List Prices will be in effect September 18, 1995

FILE IN ACCESSORY GUIDE FOR FUTURE REFERENCE

High Contact Ratio (HCR) replacement gears for discontinued Low Contact Ratio (LCR) transmission gears

1340 Models			
Description	Discontinued Low Contact Gear	High Contact Replacements (2 HCRs replace 1 LCR)	New Price Net/List
2nd gear mainshaft and 3rd gear countershaft	35026-79C	35026-94 and 35027-94	\$19.27/\$38.55 \$17.32/\$34.65
3rd gear mainshaft and 2nd gear countershaft	35027-79B	35026-94 and 35027-94	\$19.27/\$38.55 \$17.32/\$34.65
5th gear main drive (91-95 models only)	35029-91A	35029-94 and 35626-94	\$48.85/\$97.70 \$23.47/\$46.95
