HTCC Forged Stroker Piston Ring Identification

The instruction sheet for Screamin Eagle HTCC Forged Stroker Pistons, part # 22444-02, could be unclear about the identification, orientation and location of the top two rings.

The shiny plated ring fits in the top groove and it does not matter which side is up. The second ring from the top is an unplated, black colored ring with a dot that should be facing up.

The I-sheet is being updated for future kits.
