

## **Painted Parts Orders**

To expedite future orders and better serve our customers, we no longer require Technical Service authorization to order CVO painted parts. Retail parts will remain VIN restricted to protect the value of the CVO product line, but may be ordered electronically without prior approval. If the parts are being ordered in conjunction with a warranty claim, remember to apply the correct cosmetic guidelines to avoid the possibility of part returns and/or claim rejections. As we move forward, we will continue to review and try to minimize the list of parts requiring pre-authorization.
