04-06 XL Rocker Box Gaskets

Recently we have developed and tested a new rocker box gasket with the help of the dealer network techs. & dealer staff. Thanks to your feedback it was very successful.

The gasket, which is brown in color, has a part number of 17353-89C. We prefer that the “C” version gasket is used only to make repairs on the 04-06 model year Sportsters at first to allow inventory and supply of the new gasket to stabilize.

Important Note:

The 17353-89B black colored gasket can still be used for 03 and earlier XL's with the 3 PC rocker box assy. The “B” version gasket works just fine for those years. Please use your existing inventory for these applications.
