Evolution Style Base Gaskets

The 16774-86E Cylinder Base Gasket part number is now obsolete.

This rubber coated metal base gasket will continue to be available under the part number 16789-04 and is recommended for use on 2004 – 2007 Middle-Weight engines. Please use any existing inventory of the 16774-86E gaskets on these Sportster and Buell models.

The printed seal paper style cylinder base gasket has been reactivated under its original part number 16774-86D and is recommended for use on 1986 – 2003 Middle-Weight engines and all 1984 – 1999 Evolution Big Twin engines.

As current inventory is depleted the packaging of engine related gasket kits will begin to reflect these fitments and include the appropriate cylinder base gaskets.
