

### **VRSC Saddlebag Gas Spring Replacement**

There have been several recent dealer inquiries regarding a replacement gas spring for the color-matched and vinyl-wrapped V-Rod hard saddlebags (i.e. P/N 91492-08XXX). These dealer inquiries usually state that the replacement part has a different threaded end than the part that was installed in the bag originally keeping the dealer from correctly installing the service part.

The latest shipment of P/N 91485-01 did not have the two needed socket ends installed. We recently resolved this issue by reworking all stock to add these required parts and good stock of P/N 91485-01 should be available by 12/3/07. These ends allow for installation of the new spring onto the bag regardless of the original springs thread size.

The socket ends do not have an H-D part number so they cannot be ordered separately.

Any parts in stock that do not have correct ends, should be replaced and a DFS claim filed.
