

TT368 - April 14, 2008 - Michelin Commander Rear Tire Fitment Update

### **Michelin Commander Rear Tire Fitment Update**

The Michelin 150/80-16 Rear Commander tire may be difficult to mount on some tubeless 3.0" rims. Once mounted, the tire performs as designed.

Tire part number **43252-07**

We recommend using existing inventory only on tube-type wheels. This will eliminate any difficulty with properly seating the bead.

We are working to improve the mounting characteristics for tubeless applications for future offerings. (see also [P&A Bulletin 931](#))
